SUMMARY

I'm a motivated, detail-oriented tech industry professional and graduate student looking to add value to your web development team. I have been transitioning into web development and am looking to join an established industry leader to expand my expertise.

EXPERIENCE

Technical Business Analyst

uVision Partners | Columbia, MD | August 2018 – present

- Developed an internal web application for project management (PHP)
- Worked as developer lead and as a member of a development team to build websites and web applications
- Created project scope documents outlining the functionalities, content, and milestones of a client project.
- Reviewed HTML, CSS, PHP and JavaScript code for web projects to resolve bugs and improve functionality.
- Participated in production-level development activities such as coding HTML, CSS, PHP, and JavaScript when project workloads exceeded the abilities of development staff.
- Used PHP to develop customized WordPress templates and plugins for client projects whose needs called for WordPress as a CMS.

Customer Engagement Specialist

uVision Partners | Columbia, MD | May 2018 – August 2018

- Assisted existing customers with technical support needs related to our products.
- Implemented the Freshsales CRM and set up a soft phone system.
- Handled inbound as well as cold leads, serving as first point of contact to set new and follow up meetings for Account Managers with potential clients.
